

#### CLINICIAN SCIENTIST IN METABOLIC BONE DISEASE:

The Pennsylvania State University College of Medicine and the Milton S. Hershey Medical Center, Department of Medicine, Division of Endocrinology, Diabetes, and Metabolism is seeking a clinician scientist with an active research program in metabolic bone disease. The College of Medicine is expanding the scope of clinical care and research in musculoskeletal disease through the development of a Musculoskeletal Institute. Major collaborative research opportunities exist within this new initiative and throughout the College with allied clinical and basic disciplines sharing an interest in metabolic bone disease. The position is a tenure-track appointment at the rank of Assistant, Associate or Professor, based on experience. The successful candidate will be a clinician-researcher (MD or MD/PhD) investigating basic or clinical aspects of disease. He/she will develop a weekly multi-disciplinary Metabolic Bone Disease Clinic where state-of-the-art care delivery will be provided and patients will be recruited for participation in clinical trials. He/she will have a career commitment toward research and will be supported for three years to help establish a fully extramural funded program. The successful candidate will be able to capitalize on such research opportunities and sustain a successful research program. The review of applications will begin immediately and continue until the position is filled. Nominations, applications and curriculum vitae may be submitted in confidence via e-mail to [amanni@psu.edu](mailto:amanni@psu.edu) or mailed to: Andrea Manni, M.D., Chief, Division of Endocrinology, Diabetes, and Metabolism, H044, Hershey Medical Center, 500 University Drive, PO Box 850, Hershey, PA 17033. Phone 717-531-8395; fax 717-531-5726. Penn State is committed to affirmative action, equal opportunity and the diversity of its workforce. EOE-AA-M/F/D/V.
